PROFESSIONAL SUMMARY

Information Technology graduate focused on business process automation, AI-assisted application development, and data analysis. Hands-on experience delivering Microsoft Power Platform automation and reporting for an Australian managed service provider and integrating LLM APIs into a web and mobile system validated by government users. DataCamp certified SQL Associate with working knowledge of PostgreSQL, systems integration, process auditing, and stakeholder communication.

TECHNICAL SKILLS

AI and LLM Integration: Anthropic Claude API, Prompt Engineering, LLM Output Validation, AI-Assisted Development (Claude Code, Microsoft Copilot, Google Gemini)

Automation and Low-Code: Microsoft Power Platform (Power Automate, Power Apps, Power BI), DAX Measures, Scheduled Cloud Flows, Adaptive Cards, Business Process Automation, Workflow Automation

Systems Integration: REST APIs, Microsoft Graph API, Webhooks, JSON, API Key Management, Google Apps Script

Data and SQL: SQL (PostgreSQL, MySQL), Data Cleaning and Validation, Exploratory Data Analysis, CTEs and Subqueries, DataCamp DataLab, Excel Online

Web Development: JavaScript, TypeScript, HTML, CSS, React, Vite, Firebase (Firestore, Authentication, Cloud Storage, Cloud Functions), Git, GitHub, Vercel

Business Analysis and Delivery: Process Auditing, Process Mapping, Requirements Gathering, Systems Analysis, Rapid Prototyping, QA Testing, Technical Documentation, Stakeholder Communication

Collaboration Tools: Microsoft 365, SharePoint, Microsoft Teams, Outlook, Jira, Visio, Figma, Draw.io

PROFESSIONAL EXPERIENCE

Benchmark365, Australian Managed Service Provider (MSP)

February 2026 – May 2026

HR/IT Intern

- Built, tested, and deployed nine production automation workflows on Microsoft Power Platform (Power Automate, Power Apps, Power BI) within a Microsoft-only stack, integrating SharePoint, Teams, Outlook, and Excel Online through Microsoft Graph API; each workflow eliminated an estimated one to three hours of repetitive manual work.
- Designed and deployed a four-page Power BI dashboard with custom DAX measures and scheduled daily refresh for HR and administrative operations reporting.
- Audited manual HR and administrative processes with the People and Culture Consultant, HR Business Partner, analysts, and company administrators, mapping workflows and prioritizing high-frequency repetitive tasks (data entry, approvals, notifications) for automation.
- Handled each project from analysis through development, testing, and documentation as the company's first intern, using Microsoft Copilot and Claude to accelerate the work.
- Handed over all completed workflows and the dashboard to the company service account with documentation so they continued running after the internship.

PROJECTS

TranspiraFund: Intelligent Monitoring and Assessment of Barangay-level Projects in Local Government Units

Project Manager, Full Stack Web Developer, QA Tester | Capstone Project

2025 – 2026

- Led a four-person capstone team across requirements, releases, and QA; gathered requirements from the sponsor stakeholder, the Construction Services Division of the Cebu City Department of Engineering and Public Works (DEPW), and validated the system with its government users.
- Developed the web application (React, Vite) and the shared Firebase backend (Firestore, Authentication, Cloud Storage, Cloud Functions) for a cross-platform system whose React Native mobile app was built by the team, and added multi-tenant data isolation across both codebases.
- Integrated Anthropic Claude models through the Claude API to automate assessment of barangay project reports, after evaluating fine-tuned small language models and choosing the managed API for output quality and data privacy.

- Improved the AI verification step by auditing live model reasoning and adding deterministic outputs and provenance tracking to model-generated assessments.
- Traced an upload latency issue to a cross-region Cloud Storage bucket and shipped a fix that reduced upload time by 77%.
- Performed QA testing across the web and mobile applications and prioritized 16 security findings, resolving the highest-impact items first.

Analyzing Students' Mental Health (DataCamp Guided Project, Extended)

August 2026

DataCamp DataLab, PostgreSQL | Notebook linked from portfolio

- Extended the guided project's single graded query into a 13-cell notebook on a 286-record student survey dataset, covering NULL and empty-string audits, GROUP BY and HAVING aggregation, CASE-based severity banding, and a scalar subquery, following the sqlstyle.guide convention.
- Identified 18 malformed records, a higher average acculturative stress score among international students than domestic students (75.56 vs 62.84), and a decline in average depression scores from 14.73 to 6.49 as social connectedness increased; reported one result that differed from the source study rather than forcing agreement.

LEADERSHIP AND INVOLVEMENT

Event Operations Manager, Intramural Basketball Event | College of Computer Studies

2023 – 2026

- Served as the primary point of contact for the coach, tournament manager, and university administration, keeping requirements aligned across all groups.

Event Operations Lead, University eSports Tournament | College of Computer Studies

2024 – 2025

- Coordinated end-to-end logistics for a department-wide Dota 2 tournament, managing registration data for 50+ participants.

EDUCATION

Bachelor of Science in Information Technology

2022 – 2026

University of Cebu, Banilad Campus | Cebu City, Philippines

CERTIFICATIONS

- SQL Associate Certification | DataCamp
- Google AI Professional Certificate | Google (Coursera)
